Triologue Session

Making Solar the Energy Source of Choice - Building Resilient Supply Chains for Clean Energy Transitions in the Global South

11:30 AM

Partner Session by SPDA

Optimization of Engineering Design for Solar Projects - Case Studies and Best Practices

12:45PM

Technology Showcase Session

#1 Key Global Trends on Optimizing Solar EPC Supply Chain
#2 Solutions to Advance the Clean Energy Solutions in the Global South and Small Islands Countries
#3 Decarbonizing India's Electricity Sector

03:00PM

Fireside Chat

Getting Just Energy Transitions at Centrestage with Enhanced Private Sector Investments

About Becquerel Institute

Becquerel Institute is a strategy consulting company and research institute with a unique position at the crossroads of research, the market and industry. As a specialist in solar photovoltaics energy and the energy transition, the Becquerel Institute provides expert services combining technological, economic and political analysis.

We provide strategic advice to major companies in Europe and around the world, across all segments of the value chain. We collaborate with renowned technical and research centers and support numerous international organizations.

About TERI

The Energy and Resources Institute (TERI) has almost 50 years of experience in climate change research and policy practice across various geographies of the developing world, particularly in Asia. Research activities at TERI have focused on understanding, analyzing and promoting awareness related to local and global environmental issues with a multi sector overview. TERI works in close collaboration with various stakeholders including national and international governments, bilateral and multilateral agencies, civil society, and sector experts. The institute provides both technological as well as policy advice, bringing together not only learning from different regions and user groups with varied socio-economic and cultural backgrounds, but also state of the art methods and technological rigor to enable more effective national and global policy decisions.
