

# **Training Programme on Various Dimensions of Energy Policy: Challenges and Opportunities**

## **Executive summary**

---

A 10-day training programme, titled 'Various Dimensions of Energy Policy: Challenges and Opportunities' for selected high level officials of the Ministry of Water and Energy, Ethiopia began from August 19, 2013 at TERI RETREAT, Gual Pahari. The training programme is being supported by the United Nations Economic Commission for Africa.

This 10 day training programme would delve upon various themes, such as contextualizing energy policy, dealing with conventional energy in energy policy, clean energy as a central plank of energy policy, incentivizing energy efficiency, and addressing equity in energy policy and specific tools for understanding energy policy. Classroom lectures would be complemented with lab and field visits. An interactive session with the policy planners would be conducted as a part of the training programme. Several colleagues of TERI from various divisions such as Green Growth and Development, Resources Regulation and Global Security, Social Transformation, Earth Science and Climate Change, Energy Environment Technology Development, Industrial Energy Efficiency, and Sustainable Habitat would be attending the lectures in the various sessions of this 10 day training programme.

This is one of the first knowledge exchange initiative of TERI with the Ministry of Water and Energy, Ethiopia as a part of the South-South Cooperation activities of TERI.
